N°01 / PROFILE

I work on the problem behind the brief. A creative director who builds game worlds, festivals and living brand programmes that move people. Twenty years of directing experiences, from urban dance festivals to five-year corporate game worlds. I find the real problem and build the concept that solves it.

N°02 / EXPERIENCE

EVENT AGENCY · EVENTITY, SWEDEN

Oct 2023 – Now

Creative Director. Helped rebuild Eventity from a logistics-driven event company into a creative strategy agency. Leads the full creative chain: pitch strategy, visual direction, concept development, production and final creative sign-off. The hub between client, external suppliers and the in-house creative team. Worked with games company Play'n GO on a three-year international touring employee programme. Insurers such as Länsförsäkringar: a five-year strategic programme built as a game world. Productions with Petter, Molly Sandén, Veronica Maggio, Svante Randler and Therese Alshammar.

PRODUCTION STUDIO · DAT PRODUCTION, SWEDEN

Jan 2021 – Dec 2024

Creative producer and director. Owned concept to delivery for external brand clients across international markets. My own production company, run in parallel with the Eventity role. Concept, music, visual design, choreography and artist direction in the same hands. For Volvo Cars: international launches across EMEA and APAC, 300 guests per event, where one concept carried both markets unchanged. Directed artists and co-produced a live gala performance for P3 Guld on national television.

NATIONAL TOURING PRODUCTION · 5 DEGREES / DANSNÄT SVERIGE

Jan 2015 – Feb 2022

Writer and director. Took an original production from blank page to the national stage and several years of touring. Project-led and produced the entire production. Music, light, sound, visual design and live stage. Wrote, directed and choreographed. Toured schools and stages across Sweden and ran seminars over several years. Developed with Chalmers, funded by the Swedish Arts Council. Street dance meets theatrical scenography, projection and live tech.
